

Investitorima

GIANT gradi novu kategoriju: infrastrukturni operativni sistem za organizacije koje upravljaju rizikom, ljudima i kompleksnim procesima u realnom vremenu.

U industrijama sa visokim operativnim rizikom danas ne postoji dominantna platforma koja integriše bezbednost, radnu snagu, compliance i prediktivnu analitiku u jedinstveni sistem. Fragmentacija je pravilo.

Reaktivno upravljanje je standard.

Operativna slepa tačka je sistemski problem.

Mi gradimo infrastrukturu koja to menja.

Zašto sada

Regulatorni pritisci rastu.

Operativna kompleksnost eksponencijalno raste.

Distribuirane organizacije postaju norma.

Digitalna konsolidacija tradicionalnih sektora je neizbežna.

Tržište ulazi u fazu u kojoj će jedan infrastrukturni sloj postati standard.

GIANT je pozicioniran da bude taj sloj.

Naša ambicija

Ne gradimo vertikalni SaaS alat.

Gradimo operativno jezgro za risk-driven organizacije — platformu sa visokim switching cost-om, dubokom integracijom i prediktivnim AI slojem koji transformiše način na koji se rizik upravlja.

Početni fokus je fragmentirani SME i mid-market segment visoko-rizičnih sektora, sa jasnom strategijom horizontalne globalne ekspanzije.

Ovo je tržište koje čeka infrastrukturnog lidera.

Investiciona teza

- Višemilijardno fragmentirano tržište u ranoj fazi digitalne konsolidacije
- Duboka operativna integracija koja stvara snažnu retenciju
- Prediktivni AI sloj ugrađen u srž sistema
- SaaS model sa enterprise skalabilnošću
- Osnivači sa dokazanim iskustvom u izgradnji i skaliranju kompleksnih organizacija

GIANT ima potencijal da postane standard infrastrukture za prediktivno operativno upravljanje. Ne optimizujemo procese.

Redefinišemo način na koji se operativni rizik kontroliše na globalnom nivou.

Tražimo partnere koji razumeju kategorijsko liderstvo i spremni su da podrže izgradnju globalne infrastrukturne platforme.

For Investors

GIANT is building a new category:

the infrastructural operating system for organizations managing risk, workforce, and operational complexity in real time.

In high-risk and regulated industries, there is no dominant platform that unifies security, compliance, workforce intelligence, and predictive analytics into a single control layer.

Fragmentation is the norm.

Reactive management is standard.

Operational blind spots are systemic.

We are building the infrastructure that eliminates them.

Why Now

Regulatory pressure is intensifying.

Operational complexity is accelerating.

Distributed workforces are becoming the default.

Traditional industries are entering forced digital consolidation.

The market is approaching an inflection point where a unified operational layer becomes inevitable.

GIANT is positioned to become that layer.

Our Ambition

We are not building another vertical SaaS tool.

We are building the operational core for risk-driven organizations — a deeply embedded platform with high switching costs, strong retention dynamics, and an integrated predictive intelligence layer that transforms how risk is managed.

Our initial focus targets fragmented SME and mid-market segments within high-risk industries, with a clear roadmap toward horizontal global expansion.

This is a market waiting for an infrastructure leader.

Investment Thesis

- Multi-billion fragmented market entering digital consolidation
- Deep operational integration creating durable retention
- Embedded predictive AI layer at the core of the platform
- Scalable SaaS model with enterprise expansion potential
- Founders with proven experience scaling complex organizations

GIANT has the potential to become the foundational infrastructure for predictive operational management.

We are not optimizing workflows.

We are redefining how operational risk is controlled at scale.

We are seeking partners who understand category leadership and are prepared to back the build-out of a global infrastructure platform.
